

## 12 IKC ON HOLD

*The 12th International Kimberlite Conference (12 IKC) will not be held in 2022.*

*Further details to be announced in early 2023.*

The further postponement of 12 IKC reflects the continued worldwide uncertainty resulting from the COVID-19 pandemic. This decision has been made with the goal of maintaining the unique aspect of International Kimberlite Conferences: the symbiotic in-person mix of industry and academia from across the world. The change has the full support of the [International Kimberlite Conference Advisory Committee](#).

The intention remains to host the 12 IKC at the same venues in Yellowknife, with the same scientific programme, field trips, short courses and social events, in July-August of a subsequent year yet to be determined. The global and local situation will be assessed in Q1 of 2022 (and each subsequent year as necessary) to determine if planning for a July-August conference in the following year can proceed. Announcements will be provided as soon as possible, most likely in Q2 of 2022.

Generous sponsorship has been a key to the success of IKCs and 12 IKC gratefully acknowledges all of our sponsors for their continuing support ([Sponsors](#)).

Information will be posted on the 12 IKC website (please check the [Bulletin Board](#)) as well as 12 IKC social media and updates will be sent to everyone on the [12 IKC mailing list](#).
